Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Gauthier 2211973.

Gauthier discloses an apparatus and method for retrieving an object from a well. A support rod 7 has a first and second end. An expandable sleeve 3 has a plurality of external ridges 4 and is slidably disposed on the support rod 7. The sleeve 3 is moveable from an insertion position wherein the expandable sleeve may be inserted into an opening of the object (tubular) to an engaging position wherein the external ridges 4 grippingly engage the object. As to claim 2, the external ridges 4 are threads that mate with internal threads on the object. As to claim 3, the support rod 7 has a variable outer diameter. As to claim 4, expandable sleeve 3 contracts around the support rod. As to claim 5, the support rod has a portion below 7a that tapers from its greatest diameter. The greatest diameter of the support rod is less than the diameter of the object opening. As to claim 6, the rod 7 has a tapered stem extending in the uphole direction from its largest diameter. As to claim 7, the expandable sleeve is positioned around the narrower stem during insertion. As to claims 8 and 10, three longitudinal slots 6 divide the sleeve into three segments. As to method claim 27, the fishing tool is

lowered into the well, the tip 7a is inserted into the object opening, the expandable sleeve is displaced into the object opening, the expandable sleeve is expanded into engagement with the object, and the object is retrieved.

Allowable Subject Matter

Claims 9,11-17,28 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 18-26 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Neuder whose telephone number is 571-272-7032. The examiner can normally be reached on Tuesday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
